Daffodils

FOREWORD

The daffodils which we offer have been selected with the greatest care, and only after exhaustive tests in respect to quality, profusion of bloom, good constitution and garden effect. They cover a wide range of beauty and show the sometimes striking, sometimes subtle variations in this fascinating flower.

Bulbs are guaranteed true to name, and a refund will be made in case error should occur.

We allow a discount of fifteen per cent on all orders, including collections for garden clubs, of fifty dollars or more. This discount does not apply to our special offer for naturalizing.

We carry no accounts and request our customers to send remittance with their orders.

"Lonely the wind walked yesterday Across an empty world and gray, Drifting the stars throughout the night. Lo! This morning they alight, Gay daffodils for our delight."

E. H.

525

<u>KKKKKKKKKKKKKK</u>

Figures before each name denote divisions in R. H. S. classification as follows: 1a, Yellow Trumpets; 1b, White Trumpets; 1c, Bicolor Trumpets; 2a, Yellow Perianth Incomparabilis; 2b, White Perianth Incomparabilis; 3a, Yellow Perianth Barrii; 3b, White Perianth Barrii; 4a, Large-crowned Leedsii; 4b, Small-crowned Leedsii; 5, Triandrus Hybrids; 6, Cyclamineus Hybrids; 7, Jonquil Hybrids; 8, Tazetta Hybrids; 9, Poeticus; 10, Double; 11, Various.

| | EACH |
|--|--------|
| 10—ALBUS PLENUS ODORATUS. The double Poet is one of the most exquisite of all daffodils. Tall stems bear heavily scented, gardenia like flowers. One of the last to bloom | \$0.10 |
| 2a—AMIR. Tall and stately. The perianth is primrose and the crown, red orange. Good form and smooth texture. Early | .75 |
| 3a—ANNA CROFT. A giant Barrii. Big, facing flowers—yellow with a red edge on the dark yellow cup—carried on tall, stiff stems. Midseason | .20 |
| 8—ASPASIA. One of the showiest as well as one of the freest bloom- ing daffodils. Very tall. Many, vivid florets, white with a yellow eye, to each stem. Midseason to late | .10 |
| 1b—BEERSHEBA. A large flower of purest white. Perianth at right angles to the long trumpet. A fine, free blooming, early variety. Recommended for cutting. | 1.50 |
| 2a—BRIGHTLING. Rounded, soft yellow flowers which hold their heads up nicely. The flat, blood orange cup is frilled. Early | .20 |
| 2a—CARLTON. Enormous, golden flowers with a wide perianth and flaring crown. Effective. Midseason | 1.00 |
| 3b—CARMINOWE. The large, flat eye of this dazzling flower is in sharp contrast to the broad, snowy perianth. Midseason | 1.00 |
| 1b—CHASTITY. A very satisfactory white trumpet. The dead white flowers are compact and have substance. The stems are longer than most of the varieties in this division. Early | .25 |
| 1b—CORINTH. A star-shaped white trumpet with amazingly thick, smooth texture. Stately and beautiful. Early | 2.00 |
| 2a—CROESUS. A bright, sturdy flower, primrose with an expanded, deep red crown. Midseason | .15 |
| 42—CRYSTAL QUEEN. Crystal Queen due to its height, fine substance, carriage and large size is perhaps, from the gardener's point of view, the most useful Leedsii in general commerce. The flower is bone white throughout with a wide, nicely frilled cup. Very early | .10 |
| 1a—DAWSON CITY. A medium-sized, gold-colored yellow trumpet. Dependable. Vigorous. Early | .30 |

| EACH | |
|-------------|---|
| .15 | a—DIANA KASNER. A show flower blooming just after Anna Croft and like it, a giant Barrii. The dark red edge to the frilled cup is attractive—perianth, cream-colored. Robust and free flower- ing. Midseason |
| .75 | a—ETTRICK. This is really a white trumpet. It is very like Beer- sheba, the same pure white, and though not as finished as Beer sheba, it is larger and later |
| .20 | b—FIRETAIL. Firetail's fresh appearance as well as its good consti- tution recommend it. The neat, broad perianth of the softest possible yellow surrounds a deep red eye. Tall and vigorous. Early |
| .60 | 2b—FRANCISCA DRAKE. The thick, white, reflexing petals of this unique flower are stained with gold at the base and the same gold is on the big crown changing gradually to flaming scarlet at the frilled edge. The effect is brilliant. Midseason |
| 4.00 | c—GLENRAVEL. Beauty, size, quality and constitution are all com- bined in this remarkable daffodil. The perianth is white and the wide trumpet, rolled back at the rim, opens palest yellow but soon passes to white. Recommended. Early |
| .15 | a—GOLDEN FRILLED. An all yellow variety. The flower is round, compact and has a frilled crown. Free blooming and rapid in creaser. Early to midseason |
| .15 | b—HERA. If a tall, white, elegant daffodil is needed Hera answers the purpose. The beautiful, chaste flowers are all white except for a thread of pink at the edge of the cup. Midseason |
| | a—HEXAGON. A large, white flower with quality. The perianth is firm and flat, and the short trumpet opens cream but passes to white. Later than most large-crowned Leedsii. Limited |
| 1.00 .15 | stock O—INGLESCOMBE. Inglescombe far surpasses the general run of doubles. The flowers look exactly like roses, medium-sized, soft yellow roses, and are borne on tall, strong stems. Attractive in the garden or for cutting, and always reliable. Midseason |
| .25 | a—IRISH PEARL. A small, rounded flower, all white with a short, wide, frilled crown. Midseason |
| .10 | 1—JONQUILLA SIMPLEX. A dainty dwarf that has been grown and loved for centuries. The clusters of tiny, deep yellow flowers have an intensely sweet scent. Late |
| 1.50 | a—KILLIGREW. Tall and strong and richly colored—yellow with a frilled, orange cup—Killigrew comes near to being a perfect daffodil. Early to midseason |
| | |

5 4 5

| EA | CH |
|--|-----|
| 1bMILO. Milo is one of the few late white trumpets. The white flowers shade to pale green at the base. Good carriage. Mid- season to late | .50 |
| 7-NUMA POMPILIUS. Neat, little, buttercup-colored flowers with fluted cups. Rapid increaser. Midseason | .50 |
| 3b—PEGGY. Outstanding because of its large flowers with very wide, white, overlapping perianth of heavy texture. The little crown is yellow edged with orange and prettily frilled. Very tall and vigorous. Late1 | .00 |
| 2b—PRINCE FUSHIMI. There is no other daffodil like this. The big, sprawling flowers are white and flat. The petals are twisted and the big, flat. fluted crown has a wide, salmon border. Wonder- ful lasting habit either out-of-doors or as a cut flower. Very late1 | .00 |
| 4a—SUDA. One of the "pink" daffodils. The short trumpet of the exquisite flower has a ping flush that does not fade. Midseason 2 | .00 |
| 10-SNOW SPRITE. A small and charming white double. Late | .15 |
| 2b—STEADFAST. Steadfast is one of the few late dwarfs. Nice, little, white and yellow flowers that give a bright effect. Free bloom- ing. Late | .15 |
| 5a—STOKE. A white and yellow bi-color triandrus hybrid 5 | .00 |
| 5a—THALIA. Snowy flowers, two to a stem, with narrow, straight cups and reflexing petals make Thalia a lovely and distinct daf- fodil. Midseason | .20 |
| 4b—TULLIA. Tullia's texture is that of ivory, and its color is a uni- form, pale ivory except for a faint pink flush at the edge of the short, frilled cup. Tall, vigorous, and very late5 | .00 |
| 7—TULLUS HOSTILIUS. Small, overlapping flowers of a rich and intense yellow borne on tall stems. A jonquil hybrid of dis- tinction. Midseason | .15 |
| 5b—UNDINE. Smaller than Thalia but just as ethereal with its two, small, snowy flowers to a stem. A delightful dwarf for rock gardens. Midseason to late | .30 |
| | |

Mixture

A mixture of novelties that will give continuous bloom all during the daffodil season. \$4.00 per hundred; twenty-five bulbs sold at the hundred rate.

5 5 5

Special for Naturalizing

| | 10 | 100 |
|----------------|--------|--------|
| Early Virginia | \$0.80 | \$5.00 |
| Biflorus | .80 | 5.00 |
| Ornatus | .80 | 5.00 |
| Bernardino | 1.00 | 8.00 |

The first two daffodils, EARLY VIRGINIA and BIFLORUS, have been naturalized in Virginia for over two centuries. EARLY VIRGINIA is a charming, small, yellow trumpet. It is very free flowering when established and blooms ordinarily from two to three weeks before any other trumpet. BIFLORUS, on the other hand, is very, very late. There are two, creamy florets to a stem of this delightful Poetaz. It is heavily and deliciously scented.

ORNATUS is a Poeticus that is constantly being used, and with great success, for naturalizing. The flower has a pure white perianth and a scarlet rim to the little cup. It is the earliest of the Poets.

BERNARDINO for general excellence cannot be surpassed. It shows up well when used in masses as the flowers are borne on tall stems well above the foliage. The flowers are lovely—all white except for a distinct apricot edge on the flaring, frilled cup. BERNARDINO'S constitution is excellent and it is a rapid increaser. Midseason.

We also make an extraordinary offer at \$10.00 per bushel, \$3.25 per peck, of the following varieties: Sir Watkins, Emperor, White Lady, Queen of the North, Frank Miles, Evangeline, Recurvus and Laurens Koster. They will consist of rounds, small double-nosed and large slabs, all of which should bloom the next season after planting. The bulbs run about 700 to the bushel. These varieties can be ordered separately by the bushel or by the peck, or a mixture of all eight varieties can be ordered by the bushel.

Hemerocallis

FOREWORD

The great family of Hemerocallis ranging in height from six inches to five feet, in time of blooming from early May to late October, and in color range from palest yellow to deep red, has furnished plants known and loved in gardens for generations. They have offered fascinating possibilities to the hybridizer, and in the last twenty-five years remarkable results have been obtained.

The new hybrids, which far surpass the older varieties in beauty, have caused a veritable sensation in the gardening world. The range of color has been greatly extended and passes through every conceivable gradation and combination of soft yellow, brilliant gold, orange and pink, deepening to maroon. Their foliage is handsome and effective, and with their different habits and periods of bloom, their hardiness and their permanence, they are indispensable to the hardy border.

1940

| | | EACH |
|--------|--|---------|
| | AJAX—A robust semi-dwarf with showy flowers of deep orange. Free blooming and dependable. June. 2 ft | \$ 0.25 |
| | AMARYLLIS (Betscher)—A smooth, vase-shaped flower of light orange. June, July. 3 ft | .75 |
| . 4.4. | ANNA BETSCHER (Betscher)—Big, full, old gold flowers. July. 2 ¹ / ₂ ft. | .25 |
| 2 | APRICOT (Yeld)—Small, deep yellow, wide-petalled flowers. May. 2 ft. | 1.00 |
| | AUGUST PIONEER (Stout)—One of the new late bloomers. Me- dium-sized flowers, light orange delicately suffused with red. Simple and graceful. August, September. 2 ft | 4.00 |
| | AURANTIACA MAJOR—Wide, reddish orange flower with fluted petals. June. 2 ft | .50 |
| | AUREOLE—A handsome plant with many deep yellow, star-shaped flowers on sturdy, 3 ¹ / ₂ ft. stems. May, June | .25 |
| | AUTUMN HAZE (Nesmith)—Another of the new late bloomers. Open flower of pale apricot. A valuable addition. Aug- gust, September. 2 ft | 4.00 |

25

| BAGDAD (Stout)—Brilliant and bold. Dark brown and red pat- tern. June. 3 ft | 1.50 |
|---|------|
| BARDELEY (Perry)—Large, wide open flowers combining pale shades of copper and rose. June, July. 4 ft | .25 |
| BAY STATE (Betscher)—A prettily ruffled and yet compact flower of heavy substance. A clear orange which carries well. Persistent bloomer. July, August. 4 ft50 | .25 |
| BIJOU (Stout)—The many, little flowers, combining orange and deep red are brilliant and valuable notes in the border. June, July. 2 ft. | 2.50 |
| BURBANK (Burbank) — A profusion of small, dainty, greenish flow- ers over a long period of bloom. June, July. $2\frac{1}{2}$ ft | .75 |
| BURMAH (Nesmith) — A solid, reddish, medium-sized flower with a burning orange throat. July, August. 3 ft | 4.00 |
| BYNG OF VIMY (Perry)—An outstanding and beautiful hemerocallis. Pale rose with a pale yellow throat. Long, curling segments. July. $4\frac{1}{2}$ ft. | 8.00 |
| CALYPSO (Burbank)—Large, yellow flowers. The best evening bloomer. June, July. 3 ft | .75 |
| CHENGTU—Graceful stalks bear flowers of intense, bright red. They are backed with yellow and recurved. August, September. 3 ft. | 5.00 |
| CINNABAR (Stout)—Yellow shaded rose giving a peachy effect. June, July. 2 ¹ / ₂ ft. | .15 |
| CISSY GUISEPPI (Perry)—Dark red, small and pointed. Makes an attractive cut flower. July. 2 ¹ / ₂ ft | .25 |
| CRESSIDA (Betscher)—Ruddy orange with red shadings. Effective either naturalized or for more formal plantings. Attractive plant even when not in bloom. July, August. $2\frac{1}{2}$ ft | .35 |
| DAWN (Perry)—Big, bell-shaped flowers of old rose. July. $3\frac{1}{2}$ ft. | .50 |
| DAZZLER (Dreer)—Orange with green in throat. Slightly fluted segments. June, July. 2 ¹ / ₂ ft | 1.00 |
| D. D. WYMAN (Betscher)—Huge, buff-colored flowers with salmon splash across the twisting petals. Very fine. June, July. 2 ft. | .50 |
| E. A. BOWLES (Perry)—The large flat, flaring flowers are salmon, shading to apricot. June, July. 4 ft | 2.00 |
| EMILY HUME (Hume)—Deep yellow, large and fluted flowers. June, July. 3 ¹ / ₂ ft | 3.00 |

| | ESTMERE (Yeld)—The yellow flowers are backed with brown. Graceful. May. 2 ¹ / ₂ ft |
|----|--|
| | FLAMID (Yeld)—A semi-dwarf with brilliant yellow flowers backed with bronze. Early and free blooming. May, June. 2 ft |
| • | FLAVA-Open, pale yellow flowers. May. 3 ft |
| | FLAVINA (Fewkes) — A distinct dwarf with vase-shaped flowers of a nice, clear yellow. May |
| 5 | FLORHAM—An excellent garden subject. The star-shaped flowers are soft yellow and have good substance. May, June. 3 ft |
| | FLORHAM 2—A beautiful hemerocallis. The large, golden flowers are very much frilled and give a wonderfully rich effect. Free blooming. June, July. $3\frac{1}{2}$ ft |
| - | FULVA MACULATA—The very big, heavy, open flowers of this striking species are yellow shading to salmon. July. 4 ft |
| | FULVA ROSEA—The most beautiful of all the species. Clear pink. June-August. 3 ¹ / ₂ ft |
| ۹, | GEORGE YELD (Perry)—Enormous flowers on 4-ft. stems. A fresh and pleasing blend of rose, orange and apricot. July |
| | GLADYS PERRY (Perry)—Small, rounded, lavender flowers. June, July. 2 ¹ / ₂ ft |
| | GLOAMING (Cook)—Open, yellow flowers overcast with purple. July. 3 ¹ / ₂ ft |
| | GOLCONDA (Farr)—A tall, dark yellow evening bloomer with spidery segments. June, July. 2 ¹ / ₂ ft |
| | GOLDEN DREAM (Betscher)—Fine, full flowers of light orange beau- tifully frosted. June, July. 3 ft |
| | GOLDEN EMPRESS (Dennett)—Spreading, yellow flowers borne on tall stems. A late, free blooming variety. August, Septem- ber. 5 ft |
| | GOLDENI (Betscher)—Small, smooth flowers of clear orange, bloom- ing profusely from June into July. 2½ ft |
| | GOLDEN WEST (Sass)—A big, simple, golden flower of good form and with a lovely smooth finish. June, July. 4 ft |
| 5 | GOLD IMPERIAL (Perry)—The large, rich yellow flowers of this magnificent variety are borne on tall stems. Massive clump effect when in bloom. July, August. 4½ ft |
| | HARVEST MOON (Betscher) — Distinct, open, flat flowers of pinkish orange. June, July. 2 ¹ / ₂ ft |
| | |

| | HYPERION (Mead)—A big, fine flower of good substance. Color, soft primrose. July. 2 ¹ / ₂ ft. |
|---|--|
| | IMPERATOR (Perry)—Big, shallow flowers with long, narrow, pointed segments. Reddish with white midrib. June, July. 2½ ft. |
| | IRIS PERRY (Perry)—This excellent variety with lovely, copper- colored flowers has a long season of bloom. June-August. $3\frac{1}{2}$ ft. |
| | J. A. CRAWFORD (Betscher)—Small, yellow, overlapping, slightly rufflled flowers. July. 2 ft. |
| | KWANSO—Double form of the roadside daylily. Bright orange-cop- per. July. 3 ft |
| | LEMONA (Betscher)—Very tall. Small, compact, recurved flowers with waxy texture. Lemon-colored. June, July. 5 ft |
| | LEMON KING (Betscher) — A big flower, lemon-colored. June, July. 2 ¹ / ₂ ft. |
| | LINDA (Stout)—The yellow petals of this bi-color are spotted with rosy brown while the sepals are clear yellow. Large flowers on 2-ft. stems. July |
| | LOVETT'S LEMON (Lovett)—Tall stems bear lovely bouquets of very large, palest yellow flowers which curl and twist delight- fully. An unusual and charming evening bloomer which stays open on overcast days. July. 4 ft |
| | LUTEOLA—Rich yellow, medium-sized flowers with darker yellow reverse. June, July |
| | MANDARIN (Farr)—Pale yellow. Narrow, curving petals. An effective variety. June, July. 4 ft |
| - | MARGARET PERRY (Perry)—Rosy-colored flowers on tall stems. A persistent bloomer. June-Sept. 4 ft |
| | MARY GRACE (Shoemaker)—New. When established this makes a handsome plant with big, star-shaped flowers of a lovely pale shade of apricot. July. $3\frac{1}{2}$ ft |
| | MAY SADLER (Perry)—Distinct. Small, rich brownish red, orange- splashed flowers. June, July. 1½ ft |
| | MIDAS (Stout)—A glowing flower, shallow and of the brightest possible orange on 5-ft. stems. June, July |
| | MIDDENDORFII—An excellent, semi-dwarf with small, compact flowers of rich yellow. Very early. May. 2 ft |
| | S 10 S |

TTO IT

| MIKADO (Stout)—Yellow with a purple pattern. Vigorous. June July. $2\frac{1}{2}$ ft |
|--|
| MINOR—A small, dainty dwarf. Clear yellow flowers. May, June 1 ft. |
| MODESTY (Betscher)—A pretty, pale yellow, reflexing flower. June 3 ft. |
| MRS. A. H. AUSTIN (Betscher)—For general excellence Mrs. A. H Austin has not been surpassed. Large, golden flowers. June July. 3 ft |
| MRS. PERRY (Perry)—Big, showy flowers, yellow shading to orange in the throat and of the heaviest possible substance Compact and yet wide open. June, July. 3 ft |
| MRS. W. H. WYMAN (Betscher)—One of the latest and one of the best. Small, overlapping, ruffled, pale yellow flowers. August 3 ft. |
| MULTIFLORA—The tiny flowers of this interesting species are yellow and bloom on branching stems in August and September |
| OPHIR (Farr)—Large, bold, golden flowers on tall stems. July August. 4 ft |
| PALE MOON (Cleveland)—Very big flowers of a soft, pale yellow June, July. 2 ¹ / ₂ ft |
| PATRICIA (Stout)—Beautiful, large, recurving flowers, pale lemony yellow, and keeping their shape and color in the hottest sun June, July. 2 ft |
| PEACH BLOW (Nesmith)—Open, yellow flowers stained with rose Unusual. July. 2 ¹ / ₂ ft |
| PINK LUSTRE (Nesmith)—Large, lily-like flowers, slightly ruffled Color, a delicate, unfading pink with a pearly sheen. Won derful substance. July. 4 ft |
| POLLYANNA—Very flat, spreading, yellow flowers. Midseason 2½ ft. |
| QUEEN OF MAY (van Veen)—A handsome, free blooming heme rocallis. Nice, open flowers of rich yellow. May, June 3½ ft |
| QUEEN MARY (Perry)—The best early blooming yellow. Tall stately and robust. Rich yellow flowers. May-July. 4 ft |
| RADIANT (Yeld)—Quantities of light orange flowers on gracefull branching stems. June, July. 3 ft |
| \$ 11 \$ |

| RAJAH (Stout)—Flaring, scarlet orange flowers with burning red | 4.0 |
|--|-----|
| REGINALD PERRY (Perry)—Trumpet-shaped flowers of pale yellow shading to darker yellow. Sepals faintly edged with orange. June, July. 4 ft | 3.0 |
| ROYAL—Good garden subject. Compact, medium-sized, golden flowers with substance. Free blooming. June, July. 3 ft | .3 |
| SEMPERFLORENS—The tall, branching stems of this well-named variety are crowded with large, deep yellow, spreading flowers. June, July. 4 ft | 2.0 |
| SERENADE (Stout)—Pastel shades of cream and coral are exquisitely blended in dainty, ruffled flowers. June, July. 3 ft | 2.0 |
| SHARON (Cook)—Large, beautifully-shaped flower with good sub- stance. Reddish apricot. June, July. 3 ft | 5.0 |
| SHIRLEY (Ruys)—Fluted and pale yellow. June, July. 3 ft | 1.5 |
| SIRIUS (Yeld)—Shallow flowers of ruddy orange with reflexing petals deepening in color. Carries well at long distances. June, July. 3 ft | 2.5 |
| SIR MICHAEL FOSTER—Splendid, trumpet-shaped flowers, yellow with fluted edges. Tall, imposing and good. June, July. 4 ft. | .7 |
| SONNY (Stout)—Pale yellow and recurving. Like Patricia but later. July, August. 3 ft | 3.0 |
| SOUDAN (Stout)—Broad flower, pale yellow, thick texture. July. 2 ¹ / ₂ ft. | 1.5 |
| SOVEREIGN-Semi-dwarf. Yellow. Early | .2 |
| STARLIGHT (Nesmith)—Cream-colored flowers, wide open and with thick, undulating petals. Unique and beautiful. June, July. $3\frac{1}{2}$ ft. | 8.0 |
| SUNGOLD (Dreer)—Dazzling flowers of bright orange on stiff, branching stems. June, July. 2½ ft | 1.0 |
| SUNKIST (Perry)—A perfectly formed flower of delicate color but resistant to the hottest sun. Inner divisions are rosy brown, sepals flushed rosy yellow. July, Aug. 2½ ft | 1.5 |
| SUNSET (Perry)—Ruby-colored flowers with yellow midrib on petals. Small and distinct. July. 2 ft | 1.5 |
| TANGERINE (Yeld)—An attractive, orange-colored dwarf. Noth- | |

Collection A

This collection is designed to give continuous bloom from the first week of May into September. The varieties are listed in the order of blooming, Middendorfii being the first, and Sunny West the last to bloom. The varieties have been chosen with care so that none of the colors clash, either with each other, or with other material in the border.

| Middendorfii | \$0.25 |
